PORCINE HEALTH
MANAGEMENT

EAphm

EUROPEAN ASSOCIATION OF PORCINE HEALTH MANAGEMENT

ECPHM

- Encouraging research and other contributions to the science and practice of porcine herd health management and promoting its communication and dissemination

EAPHM

- Improving and standardising undergraduate and post-graduate education and developing continuing professional development

We had a dream...

- To be able to provide to our associates, diplomates and residents an independent platform to disseminate basic and applied research in the field of porcine health and management
- To generate a platform able to provide scientific quality to the world
- To internationalize the visibility of both EA and EC from an institutional and scientific-technical points of view

A main step of the dream is nowadays a reality...

**PORCINE HEALTH
MANAGEMENT**

An open access, peer-reviewed, online scientific journal published by BioMed Central, affiliated with the EAPHM and ECPHM

About *Porcine Health Management*

[Aims and scope](#) | [Open access](#) | [Article-processing charges](#) | [Indexing services](#) |
[Publication and peer review process](#) | [Editorial policies](#) | [Citing articles in *Porcine Health Management*](#)
| [Why publish your article in *Porcine Health Management*?](#)

This page includes information about the aims and scope of *Porcine Health Management*, editorial policies, open access and article-processing charges, the peer review process and other information. For details of how to prepare and submit a manuscript through the [online submission system](#), please see the [instructions for authors](#).

Aims & scope

Porcine Health Management (PHM) aims to publish relevant, novel and revised information regarding all aspects on swine health medicine and production.

The journal provides a venue for global research on swine health and production, including infectious and non-infectious diseases, reproduction, epidemiology, management, economics, genetics, housing, nutrition, animal welfare and ethics, legislation, food safety, drugs and surgery.

PHM also welcomes submissions on relevant clinical cases related with all areas mentioned above. In addition, the journal covers wildlife aspects considered to have an interrelation with domestic swine.

Open access

All articles published by *Porcine Health Management* are made freely and permanently accessible online immediately upon publication, without subscription charges or registration barriers. Further

PORCINE HEALTH MANAGEMENT

- Two editors-in-chief appointed:

Dr. Guy-Pierre Martineau, FR

Dr. Stan Done, UK

- In the process of selecting the editorial board members

- **Aims and scope:**

- PHM aims to publish relevant, novel and revised information regarding all aspects on swine health medicine and production
- The journal provides a venue for global research on swine health and production, including infectious and non-infectious diseases, reproduction, epidemiology, management, economics, genetics, housing, nutrition, animal welfare and ethics, legislation, food safety, drugs and surgery
- PHM also welcomes submissions on relevant clinical cases related with all areas mentioned above. In addition, the journal covers wildlife aspects considered to have an interrelation with domestic swine

- Major advantage for EAPHM and ECPHM members:
 - Open-access journals have a significant “article processing charge” (APC) for the authors
 - APCs for those accepted manuscripts coming from EA and EC members will be paid by the Societies

But of course, the journal is open for worldwide submissions, with the same conditions of other existing open-access journals!!!
